Experience

Lead Software Engineer, Cyberonium

Remote, Canadian company, Oct 2026 to present

- Promoted to lead software engineer for my work on the NanoNear project.
- Lead development of the NanoNear SaaS suite: Nano CRM, Nano Sign, Nano Email Marketing, Nano Track, Nano HR, Nano Work, Nano POS, Nano PBX and an AI app builder.
- Shape the product architecture: one account across every product, with plans and billing kept separate per product.
- Work on cyberonium.com, the company's managed IT marketplace, including company registration and profiles.
- Deploy and run production apps on shared cPanel hosting.

Junior Developer, Cyberonium

Remote, Canadian company, Aug 2025 to Oct 2026

- Built features across the NanoNear products and cyberonium.com, which led to the promotion to lead in October 2026.

Contract Developer, Flycast Technology

Project based, freelance, 1 year contract

- Delivered project based development work under a one year freelance contract, with a focus on SQL and databases.

Selected projects

NanoNear product suite

A family of business SaaS products (CRM, Sign, Email Marketing, Track, HR and more) sharing one account, each sold and billed on its own.

Nano PBX

A cloud phone system and in-browser softphone for the NanoNear CRM.

Nano POS

A browser point-of-sale for shops, with a desktop till app.

Nano HR
Hiring tools: shareable job links, resumes normalised into one format, private screening questions and video intros.

NanoNear App Builder
An AI app builder in the style of Lovable, with additional features.

Education

BS Computer Engineering
FAST NUCES (National University of Computer and Emerging Sciences), Lahore, 2023 to 2027
